

Many organizations issue identity (ID) badges for higher security and information integrity. ID badges provide instant verification of individuals that require authorized access to a jobsite or certain facilities and assets.

e-VERIFILE.COM Inc. can help streamline the credentialing process through **BadgeRITE**.

BadgeRITE is an online solution that reduces the time needed to produce, distribute and document photo identification badges.

HOW IT WORKS

- Visit **badgerite.com** to subscribe to the service or if you're an existing **e-VERIFILE.COM** subscriber, request that BadgeRITE be added to your account.
- Login, click the CREATE button and follow the instructions to **Design your Badge Template**. Each template can be customized by badge type, layout (horizontal/vertical) and include corporate logos, colors and more
- Once your template has been created, enter personnel info and photos into the system. The info and photos are automatically incorporated into the correct Badge Template.
- Hit the ORDER button to generate the badge and order **accessories** like badge clips and lanyards.
- e-VERIFILE.COM manages the delivery of the badges via postal and/or overnight mail. Issued badges are electronically documented in the system for review and easy on-site verification.

BadgeRITE is a Custom Support Solution from e-VERIFILE.COM Inc.

e-VERIFILE.COM streamlines routine people management and risk assessment tasks for a variety of organizations worldwide.

The Easy Way to Do ID Badges

BadgeRITE is an easy online solution that saves time and streamlines the process of producing ID credentialing.

Use BadgeRITE to help design and create customized Photo ID Badges for your employees, contractor/vendor personnel, visitors, volunteers, and more.

Do More with BadgeRITE

Augment your BadgeRITE by adding these unique solutions from e-VERIFILE:

On Demand Background Screening

Screen individuals before you issue them a badge with **On Demand Screening** solutions from e-VERIFILE.COM. Conduct an array of background checks and searches including public records, government watch lists and more.

The resulting data can be seamlessly integrated into BadgeRITE and auto-evaluated with **GradeRITE** to help determine a prospective badge recipient's eligibility to receive a badge.

Custom Badge Requests

No matter the design or type, e-VERIFILE can help develop special credentialing to you're your special needs.

Whether you require uniquely designed **Flash**, **HID** or **bar coded** badges, e-VERIFILE Specialists will work with you to create badges that meet your criteria and that go beyond the standard BadgeRITE fare.

Total Access Management Solutions

Leverage the full power of BadgeRITE with **EntrySafe**—the all-in-one solution that streamlines routine access management tasks.

EntrySafe not only combines the basic features of BadgeRITE, but also assists with credentialing requests, visitor registrations and screening and on-site badge verifications all from one easy-to-use web-based interface.
